Stress Horizon

Horizon 2020: next five years budgets

1 – Excellence

1.1 – Objectives

A key achievement of the new European Parliament has been to insert a "revision clause" which will require the new European Commission to present a review of the functioning of the EU'S long-run budget (Multi-annual Financial Framework – MFF) in 2016 taking full account of the economic situation at the time.

Up to now, Horizon 2020 Calls for Proposals, topics and budgets, were decided for the first two years 2014-2015.

Objective of this proposal is to examine an European Scenario where one or more Member State, under the pressure of internal financial shocks, i.e. a GDP significant decrease or for other economical and/or political reasons, might not be able to contribute to the EU's long-term budget according to the established amount.

According to the Revision Clause of the European Parliament that takes into account the "economic situation at the time", 2016, also the overall Horizon 2020 budget might suffer a decrease for the next years.

Objective of this proposal, to be carried out with the help of economists, scientists and industrial entrepreneurs, of the 28 Member States, is to submit for the next five years 2016-2020 the Horizon 2020 Programme to a "stress test" in order to examine what might happen in case of different budget decreases.

In fact, there are many possible approaches: for instance, a simple linear cut to the budgets of the future Calls, or to propose different priorities or postponing some topics after 2020, etc. etc.

It seems useful that the scientific and industrial European world suggests some criteria and priorities in case of future decreases of Horizon 2020 budget at the mid-term revision of 2016 in order to submit their conclusions to the European Commission Authorities that have the responsibility to plan and schedule scientific activities to be carried out under the Horizon 2020 Programme for the next five years.

1.2 – Relation to the Work programme

The work programme topic Stress Horizon relates is to be decided because the proposal fulfils the Call requirements, ie.:

- a) Call Specific Challenge:
- b) Call Scope:
- c) Call Expected impact:
- d) Call Types of action:

Code 1 (to be written once all Work packages are ready)

1.3 – Concept and approach

ode 2 (to be written once all Work packages are ready)

(Describe the overall project starting from the activities of WP2, WP3, and WP4: their approach, methodology, etc. and any national or international research linked to this project).

1.4 Ambition

Code 3 (to be written once all Work packages are ready)

(Describe for the overall Project, i.e. for the activities reported in WP2, WP3, and WP4:

- 1 the state-of-the-art
- 2 the progress beyond the state-of-the-art
- 3 the literature concerning the previous points)

2 – Impact

2.1 -Expected impacts

Code 4 (to be written once all Work packages are ready)

(Describe how a lasting impact of the Project will be ensured by the following strategic Project choices):

(In particular, describe the following Project outcomes that will become available in a practical use):

.....

2.2 - Measures to maximize impact

Code 5 (to be written once all Work packages are ready)

a) Dissemination and exploitation of results
Preparation of a draft plan for dissemination of project results

All Partners will prepare items for publication (scientific papers, conference abstracts, website updates, etc.). Full details about how to publish Project results are outlined into the Consortium agreement.

b) Communication activities

All partners will describe, according to their opinion:

- Market impacts of the project
- Market size and potential
- Steps towards commercialization
- Necessity of a European approach

3 – IMPLEMENTATION

3.1 Work plan - work packages, deliverables and milestones

Code 6 (to be written once all Work packages are ready)

(Describe the overall Work Plan based on the activities of the five Work packages.)

Timing of the Work plan (Gantt chart)
Inter-relation of the components (Pert chart)

The following five Work Packages: WP1, WP2, WP3, WP4 and WP5 represent the structure of this Work plan

Table 3.1a: Work package WP1 description

Work package title						
Participant number	X	Y	Z	W		
Short name of participant	X	Y	Z	W		
Person/months per participant:	X	Y	Z	W		

Objectives

This WP guarantees that:

- an effective coordinating structure is created
- the research project is carried out according to the time schedule and budget established, meetings are organized to enable collaboration and management of consortium partners,
- the project progress of the WPs is managed and monitored against contractual deliverables,
- the WPs objectives are achieved efficiently,
- a system is created to provide a continuous evaluation feedback and a constant project monitoring.
- the project is managed according to the contract between the STRESS HORIZON consortium partners and the EC, maintaining a continuous link with the EC, and the overall legal, contractual, ethical, financial and administrative management activities are performed ensuring accurate and timely distribution of funds, reporting on activities, etc.).

Description of work

WP 1 is the Coordination Work Package, which will last for the whole duration of the project.

1 - Coordinator

The responsibility of the project coordination will be taken by who will supply the Project Coordinator. The project coordinator is responsible for all deliverables.

The coordinator's main activities concern the monitoring and management of the agreed deliverables and milestones in the contract between the consortium and the EC, and the smooth running of the project as a whole. The coordinator will maintain continuous relationships with the General Assembly including the Work Package leaders and will report to the EU. For the day-to-day project management, the Project Officer (PO) supports the coordinator. She/he will focus on the daily management, coordination and administrative and financial aspects of the project.

Coordinator activities:

a) Kick Off meeting.

Upon signature of the contract with the European Commission, the project coordinator will organize an initial kick-off meeting for all personnel involved in the project. This kick-off meeting will enable the participants to obtain a better perspective of their role in the STRESS HORIZON project. Prior to concluding the contract with the EC, a Consortium Agreement will be signed between the project partners

b) Process Management tasks.

The Project Coordinator will conduct the overall project management, as specified in the contract between the consortium and the EC, i.e.:

- Organize the project meetings, workshops, and receive reports;
- Oversee the drawing up and timely signing of the Consortium Agreement;
- Ensure that all parties will sign the contract with the EC on time;
- Initiate, prepare and preside over regular project progress meetings and the dissemination of information to all partners pertaining to these meetings;
- Act as liaison to the European Commission on behalf of the group in all verbal and written communication:
 - Inform the Commission properly about the situation and progress of the work;
 - Inform the Commission in advance of the date and subject of the meetings;
- Coordinate the overall financial, administrative and contractual activities of the project, including monitoring and maintaining the overall adherence to the financial budgets;
- Report the overall budgetary situation of the project to the EC, based on the cost declarations from the individual partners;

Coordinate the dissemination of knowledge and deliverables.

3 - Operational project management

The consortium agreement and contract conditions with the EC will be monitored by the General Assembly to ensure compliance by all participating parties.

For each work package, a WP leader has been appointed to take primary technical control of and responsibility for the proper management and execution of the tasks related to the particular WP. He/she establishes (in co- ordination with the Project Coordinator) the detailed schedule of his/her WP. He/she is also responsible for the quality of, and the correct and timely submission of deliverables relating to his/her WP. Each WP leader is also appointed to chair the meetings among the partners participating to his/her WP and will communicate frequently both formally and informally with the workers in the WP.

4- Monitoring:

a) Internal reporting

In order to monitor and guide the consortium, each individual partner will regularly (after the first four months and thereafter at four-monthly intervals) submit a progress report to the respective Work Package leaders. On the basis of these reports, the WP leaders will monitor progress and take any necessary action to ensure the work package remains on schedule.

Each WP leader is required to provide the PC regularly (after four months and thereafter at four monthly intervals) with a progress report concerning his/her WP and containing sufficient technical information to enable the PC to be assured that work is progressing according to plan.

The status of the project will be updated by the PC in a Project Dashboard that will highlight all key progress indicators of the project and areas at risk.

b) External reporting

The combined WP reports (task of the PC) will be discussed and evaluated during meetings of the General Assembly and will constitute the interim reports and form the basis for the annual and final reports that will be submitted to the European Commission by the PC.

Based on the EU model format the coordinator will ensure that all partners provide a consistent flow of information containing key points on the financial progress in the form of a financial report and associated financial plan, as well as an activity report and updated implementation plan.

c) Internal communication

A communication plan will be agreed upon by the General Assembly at the kick-off meeting and will define means and methodology of communication among the project partners.

5- Financial / administrative management

The Project Officer of will ensure that all budgetary actions are performed according to the rules and regulations of the EC and the consortium agreement. This includes amongst others establishing a good operating practice for financial management adapted to the financial system of each participating party, to ensure that the received funds are correctly distributed, accounted for, cost statements are received.

Deliverables

- **Consortium Agreement.** A Consortium Agreement will be concluded among the project partners.
- Kick-Off meeting minutes.
- Meeting/workshop minutes.
- General Assembly meeting minutes.
- Internal website with public areas for communication and data sharing
- **Partners progress report.** Each individual partner will regularly submit a progress report to the respective Work Package leaders in order to monitor progress and to ensure the work package remains on schedule.
- Work Package progress report. Each WP leader is required to provide the PC regularly with a WP progress report concerning his/her WP to enable the PC to be assured that work is progressing according to plan.
- *Interim reports*. The PC will combine the WP progress reports and will constitute the interim reports.
- Progress reports to the EC. Annually the PC will submit progress reports to the EC.
- *Final report (technical, financial, deliverables).* The PC will submit the final report to EC.

Table 3.1a: Work package WP2 description

Objectives

Objective of this proposal is to examine an European Scenario where one or more Member State, under the pressure of internal financial shocks, i.e. a GDP significant decrease or for other economical and/or political reasons, might not be able to contribute to the EU's long-term budget according to the established amount.

(Fuschi Damiano)

Promotion and enhancement of cultural heritage: comparative juridical aspects

The aim of this work package is to analyze and propose Government policy to the safeguard of the cultural heritage and cultural promotion.

In order to achieve a wide knowledge of the subject it is necessary to focus on differents points.

First of all we have to explain what we mean by "cultural heritage"; on the assumption that it is impossible to separate the cultural items belonging to the historical and artistic heritage of a nation from their "overall environmental context" (archaeological areas, villages, towns, monumental complexes) while otherwise most urban and artificial landscapes belong to the category of environmental items which are the fruit of the human creativity. So the widest notion is the one of "environment", since the term includes the cultural heritage, naturalistic elements and the changes due to the human behaviour, with reference to the relation aspects involved. The "cultural heritage" may also be a broad definition, since therein included are all the elements concerning "culture", as well as "individual and collective goods" (landscapes, areas, complexes) representing the artistic, architectonic, archaelogical heritage of a community.

Once defined what a "cultural heritage" is, the next step of the research is to classificate goods and define their juridical regime, to point out the elements that show a clear similarity of patterns and then to underline those peculiar differences which characterize certain legal systems in order to compare the different juridical experiences taken into consideration.

(Fuschi Damiano)

Description of work

(Fuschi Damiano)

The focus of this work is to point out the elements that show a clear similarity of patterns, even if the application and the effects are different one from the others. Then to underline those peculiar differences which characterize certain legal systems in order to compare the different juridical experiences taken into consideration.

The cultural policy, meant as the set of activities directed to the safeguard, the management and promotion of the cultural heritage, solicits a higher intensity of the administrative function which is characteristic of the modern State everywhere, and equally for the environment policy. The substantial uniformity of the constitutional principles concerning the safeguard and enhancement of the arts, undoubtedly had an impact on the special juridical regime that nearly all the States have adopted for the safeguard and promotion of their cultural heritage. The cultural heritage is almost always subject to special control. As regards the object taken into account by the regulation, the several cultural events, monuments, historic centres, archaeology, museums, libraries, archives, the landscape, natural beauties, the areas subject to special conservation obligations may be mentioned as examples.

(Fuschi Damiano)

Objectives

Objectives if this Work package are

1 - Dissemination and exploitation of results

Definition of a work plan for dissemination and exploitation of the project results; implementation of a social platform

2- Communication activities

Organization of events concerning the partners of the Consortium; preparation of a website; organization of mid term workshops and final conference open to EU Commission experts

Description of work

This Work package aim is to improve the dissemination of information about the project results and deliverables: it is a core measure of the project's success. According to this preliminary consideration, different promotion and dissemination actions are foreseen and addressed to both experts in the field and any other Stakeholders.

1 - Dissemination of project results through scientific journals and through participation in Congresses, conferences and workshops

All project results will be shared and disseminated among the project Partners. In order to ensure high visibility of the project within the scientific community, publication in high impact factor scientific journals will be encouraged, as will be presentation at relevant workshops and conferences. Each research institution in this proposal will contribute to this dissemination as participants in WP 5.

2 - Organization of a workshop and a conference

In particular, within six months from the starting of the project a workshop will be held open to specific stakeholders.

3 - Demonstration event. In close collaboration with the WP2, WP3 and WP4 teams a demonstration event will be arranged in order to show how the newly developed techniques work.

This will exhibit the validity and usefulness of the new tools to a competent audience, able to comment and discuss the results obtained.

4 - STRESS HORIZON Website. Promotion of the demonstration event will be made through this website.

Other activities:

- 1 Organization of the partners consortium meeting before and throughout the project activity according to the Coordinator suggestions (for 24 months); application of tools and methodologies of risk management to the governance of single parts of the project according to the suggestions of the project coordinator.
- 2 Dissemination and exploitation of results deliverables, elaboration of a website concerning the activities of the project; maintenance and adjournments of the website during and after the project preparation; organization of events.
- 3– Project internal communication of documents and deliverables among the project partners

Deliverables

- Workshop and conference in and related information & dissemination material
- Papers in scientific journals
- Launch of fully functional Knowledge Base
- **Demonstration** even
- Commercial service development
- -Business Plan for exploitation of products and services

3.2-Management structure and procedures

In order to efficiently manage the project, a specific WP dedicated to coordination and management has been foreseen in the project work plan, to ensure that suitable priority and attention will be given to project management. Within this WP 1 all the aspects related to administrative and quality management of the project will be included. The responsibility of the project coordination will be taken by XXX that will supply the Project Coordinator (PC) and a Project Officer (PO).

The project partners are fully committed and agree to work together with the utmost cooperation for the timely fulfilment of their responsibilities. Previous experiences and participations in European framework programs have led to the decision to keep this management structure as simple as possible. The **overall organizational structure** proposed for the STRESS HORIZON project is presented in Figure 1. It is aimed at ensuring the fulfilment of the project objectives, by allowing clear and continuous communication among the project partners.

a) Project Coordinator

The overall management of the project will be the responsibility of XXX as coordinating partner. Key to this is the role of the Project Coordinator, which will be carried out by

The **Project Coordinator** (PC) will be responsible for the **overall coordination** of the **technical and scientific activities, and all other aspects of the project** including **management of potential conflicts** and compromise negotiation in the unlikely event of conflict and will also be the primary contact person for the European Commission. Hence he/she will be responsible for all communication with - and reporting to - the EC.

The **Project Officer** (PO) will be responsible for day-to-day **legal and contractual management** of the project and **administrative and financial activities.** The PO will report to the PC.

In particular, according to the Consortium Agreement, the Coordinator shall be responsible for:

- Monitoring compliance by the Parties with their obligations
- Keeping the address list of Members and other contact persons updated and available
- Collecting, reviewing and submitting information on the progress of the project and reports and other deliverables (including financial statements and related certification) to the Funding Authority

- Preparing the meetings, proposing decisions and preparing the agenda of General Assembly meetings, chairing the meetings, preparing the minutes of the meetings and monitoring the implementation of decisions taken at meetings
- Transmitting promptly documents and information connected with the project
- Administering the financial contribution of the Funding Authority and fulfilling the financial tasks
- Providing, upon request, the Parties with official copies or originals of documents which are in the sole possession of the Coordinator when such copies or originals are necessary for the Parties to present claims.

The following Table 3.2a gives a list of milestones.

Code 10 (to be written once Work packages are ready)

TABLE 3.2a – List of milestones

Milestone number	Milestone name	Related work package(s)	Estimated date	Mean of verification

The following Table 3.2b gives the critical risks identified and the possible mitigating actions.

Code 11 (to be written once Work packages are ready)

TABLE 3.2b – Critical risks for implementation

Description of risk	Work package(s) involved	Proposed risk- mitigation measures

b) The General Assembly

The General Assembly is the decision making body of the Consortium.

The General Assembly shall consist of one representative of each Party (hereinafter referred to as "Member").

Each Member shall be duly authorised to deliberate, negotiate and decide on all matters listed in the Consortium Agreement.

The Coordinator shall chair all meetings of the General Assembly, unless decided otherwise by the General Assembly.

The Parties agree to abide by all decisions of the General Assembly.

This does not prevent the Parties from submitting a dispute for resolution in accordance with the provisions of settlement of disputes.

Operational procedures for the General Assembly representation in meetings Any Member:

- should be present or represented at any meeting;
- may appoint a substitute or a proxy to attend and vote at any meeting;
- shall participate in a cooperative manner in the meetings.

c) The Work Package leaders

All technical and scientific issues of the project, in particular relating to the interdependence between and coherence of the different WPs - will be managed and consolidated by **the Work Package leaders** who will **report to the PC directly**. To achieve the R&D objectives of the project, the experimental, scientific and technical work has been organized into 3 R&D WPs (WP2,WP3, and WP4).

For each of them, a WP leader will be appointed to take primary technical control of and responsibility for the proper management and execution of the tasks related to the particular WP. In particular, he/she establishes (in coordination with the PC) the detailed schedule of his/her WP and the work in progress. Each WP leader is also responsible for identification of risks and for proposing solutions to the PC in respect of his/her WP. Taking into account that any of these R&D WPs will be the responsibility of three/four partners, WP leaders will be rotated among partners any four months.

Each WP leader is required to provide the PC at four monthly intervals with a progress report concerning his/her WP and containing sufficient technical information to enable the PC to be assured that work is progressing according to plan.

d) Means for governance and control

The means for governance and control (quality assurance, consortium agreement and communication plan) will be tailored to the scale of the STRESS HORIZON project. A correctly empowered governance and control for the overall project management will be guaranteed by following means:

The Consortium Agreement: All the STRESS HORIZON rules will be included and described in detail in the **Consortium Agreement**.

This document will define:

- the responsibilities, mutual obligations and roles of the partners;
- the division of the budget;
- the strategy for the exploitation of results;
- the rules for the settlement of disputes

The Consortium Agreement will be signed within the first month of the project and will define in a very clear and detailed way: roles of each partner, formal rules of participation, voting mechanisms, criteria for evaluation of activities realized by each partner, rules for budget re-allocation, etc.

The Quality Plan: A **quality plan** will be agreed by the General Assembly at the Kick-off meeting, and will ensure that appropriate quality assurance is undertaken. It will include:

persons responsible for quality assurance, quality standards, methodologies and procedures;

procedures for identification, distribution, collection, filing, maintenance and disposal of quality records resources, schedule and responsibilities for conducting the quality assurance activities

Quality control will represent a key issue in the overall management of the project, since it plays a critical role in keeping the action aligned towards its final objectives.

e) Project Meetings

An initial "launch/kick-off meeting will be organized at the start of the STRESS HORIZON project for all the personnel involved in the project. The purpose of the kick-off meeting is to:

- Present to all involved an overview of the project;
- Enable each participant to obtain a better perspective of his/her role in the STRESS HORIZON project and set this in context with the roles and skills of other project members;
 - Define the main outline of the Consortium Agreement;
- Establish procedures for Quality Assurance and formalize policies for publication, intellectual property rights and any arbitration procedures.

3.3 –Consortium as a whole

Partners of the Consortium will be all the partners working on the five Work packages. Each partner will designate a member to participate to the meetings of the Consortium.

All the rules reported in the EU suggested Consortium Agreement must be followed.

The Consortium partners belong to very different scientific disciplines, from IT engineers to archaeologists, from robotics and mechanical experts and they have to complement one another in order to create a Robotic System suitable for this project.

Analogously, the presence inside the Consortium of Enterprises is fundamental for building and experimenting the products of project.

The STRESS HORIZON project is proposed by a consortium of xx partners from X EU Member States and comprises all the appropriate key players to ensure the availability of resources, capacities, technologies, capabilities, technical and operational knowledge required for the timely achievement of the goal of the project.

The consortium will bring together European efforts and methodological/technological developments and has therefore a high potential for developing and validation of innovative non-destructive diagnosis techniques to assess and monitor the state of preservation of the European heritage.

The partners to the STRESS HORIZON project have the following areas of interest and activity, Table 3.3.

Code 12 Any Partner should send these data by mail to <u>each2014@gmail.com</u>; please only one sentence!)

Table 3.3 Areas of interest/activity for STRESS HORIZON project partners

	services		
	Total		

3.4.2 - Travel costs (other direct costs)

The total travel costs are € xxxx and refer to meeting, working session and other issues related to the coordination of participants' contributions, as well as to the attendance of conferences and events for dissemination purposes. In more detail, the following travels have been foreseen, so far, for calculating the travel costs:

Project meetings: technical and management meetings where all participants will be present, and where technical issues as well as management issues will be discussed. 6 project meetings are foreseen for the project duration (one meeting each 6 months of project).

Technical meetings: meetings needed among two or more partners collaborating on the same tasks. The twice yearly Project meetings will form a significant venue for inter WP discussions, and will make provision for specific subsets of WP managers to meet outside the main workshop on request, e.g. for inter- and intra-WP decision-making purposes.

Dissemination meetings: participation to international conferences/workshops to present the STRESS HORIZON results, and for attendance to the STRESS HORIZON workshop. Each participant involved in WP5, will receive travel costs.

3.4.3 - Consumables (other direct costs)

The total costs for consumables amount to € xxxxx.

The consumables with STRESS HORIZON are mostly related to preparation, analysis, characterisation, validation, process optimisation, pre-prototype development and tests and are summarized in table 3.4.3

Table 3.4.3.a – Consumables per work package

Consumables description

A total of $\mathbf{\epsilon}$ **xxx** has been included for the purchase of durable equipment by the project partners. The equipment costs were calculated on depreciation basis, considering the duration of usage of the equipment within the project.
